

ERRATUM

In section II of the paper entitled "Galactic Chemical Evolution and the Helium Enrichment" (*Rev. Astron. Astrof.* **1**, 355, 1976), $(1-R)y_X$ is not the mass fraction ejected to the interstellar medium per stellar generation of newly synthesized helium; strictly speaking, it is the mass fraction ejected to the interstellar medium per stellar generation of newly synthesized helium, minus the initial helium

processed into heavier elements. All the equations and results are based on the correct definition and thus remain unaltered.

We wish to thank Dr. R. Gingold for pointing out this error.

The heads of columns 5 and 6 of Table 2 (page 356) must read y_X/y_Z and y_X^*/y_X instead of y_X/y_X and y_X^*/y_Z .

S. Hacyan, D. Dultzin-Hacyan, S. Torres-Peimbert and M. Peimbert.
